

# INTEGRATED POLICY

to ensure continuity between the past and the future

## QUALITY

The CAM relies on an **Integrated Management System** manual to assess the risks and opportunities of each process implemented to achieve the main objective, which is to ensure **customer satisfaction**. Employee training, supplier evaluation, and monitoring of economic growth are just some of the internal processes implemented **to guarantee product quality**.

## ENVIRONMENT

The company owns a photovoltaic system that helps **reduce CO2 emissions** into the environment, in line with the objectives set by the European Commission. It is committed to improving the **Life Cycle Assessment** from the early stages of design to the disposal of products, with goals aimed at **safeguarding environmental resources and aligning with the UN's 2030 Agenda**.

## INFORMATION

The company ensures the **security of information** and systems through appropriate organizational tools. **It ensures secure access to data**, the management of critical issues, and the prevention of unauthorized processing. The procedures implemented allow for the timely monitoring and management of anomalies, incidents, and vulnerabilities, ensuring operational continuity and compliance with regulations and contractual obligations with third parties.

## SECURITY

CAM prioritizes the **health and safety of its employees** by adopting life-saving rules and personal protective equipment. It promotes the prompt reporting of incidents and is committed to a thorough risk assessment, **implementing preventive measures** to reduce hazards and occupational diseases. Employees are involved in the decision-making process, and good safety practices are encouraged, alongside the **promotion of gender equality**.
